Complete Listing of Pending Claims

- 1. (Original) Enantiomerically enriched 3-{3-[1-(Isopropyl-phenyl-carbamoylmethyl)-2,4-dioxo-5-phenyl-2,3,4,5-tetrahydro-1H-benzo[b][1,4]diazepine-3-yl]-ureido} benzoic acid, or a pharmaceutically acceptable salt or solvate thereof.
- (Original) The enantiomerically enriched compound of Claim 1
 wherein the (+) enantiomer, or a pharmaceutically acceptable salt or
 solvate thereof, is at least 90% of said compound.
- 3. (Previously presented) The enantiomerically enriched compound of Claim 2, wherein the (+) enantiomer, or a pharmaceutically acceptable salt or solvate thereof, is at least 99% of said compound.
- (Previously presented) A pharmaceutical composition comprising the enantiomerically enriched compound as claimed in claim 1 in admixture with one or more pharmaceutically acceptable carriers and or excipients.
- (Currently amended) A method for treating a CCK-A mediated disease or condition comprising administration to a mammal ef an effective amount of compound as claimed in claim 1.
- 6. (Currently amended) A method for treating a CCK-A mediated disease or condition comprising administration to a mammal of the a pharmaceutical composition as claimed in Claim 4.
- (Previously presented) The method as claimed in claim 5, wherein said disease or condition is obesity, gallbladder stasis, or diabetes.
- (Previously presented) The method as claimed in claim 5, wherein said disease or condition is obesity.

PU3611USW

- 10. (Currently amended) A process for the preparation of a compound as claimed in of claim 1 which comprises:
 - (a) resolution of racemic 3-{3-[1-(isopropyl-phenyl-carbamoylmethyl)-2,4-dioxo-5-phenyl-2,3,4,5-tetrahydro-1H-benzo[b][1,4]diazepine-3-yl]-ureido}-benzoic acid by chiral hplc;
 - (b) reaction of the appropriate enantiomer of the amine of formula (II)

with the isocyanate of formula (III), imidazolide of formula (IV) or optionally substituted phenyl carbamate of formula (V)

$$O = C = N$$

$$(III)$$

$$CO_2R$$

$$(IV)$$

$$CO_2R$$

$$CO_2R$$

followed by removal of the carboxy protecting group R.

PU3611USW

11. (Currently amended) A process ac claimed in according to claim 10 wherein the required compound of claim 1 is prepared said preparation is via the racemic amine (II) which has been prepared by

concomitant reduction and hydrogenolysis of the oxime (VI),

wherein R₂ is an optionally substituted benzyl group.

(Currently amended) A process as claimed in according to claim 11
wherein the oxime (VI) is prepared from the ortho phenylene diamine (VII)
and an activated derivative of the diacid (VIII),

wherein, R2 is an optionally substituted benzyl group.

PU3611USW

13. (Cancelled) A modicament for the treatment of a CCK A modicated disease or condition comprising the compound of Claim 1.
